Development: VS Code, Atom

Competitive Programming: VS Code, CodeLite, IntelliJ

Testing: Postman, ThunderClient (VSC Extension)

SAHIL KAMATH

ABOUT ME

———–

I am a tech-enthusiast and like to keep myself updated with recent development in the world of technology.
My motto is quite simple - "Know everything about something and something about everything."
As of now, the 'everything about something' for me includes back-end web development which includes software like Node.js, Express, MongoDB, etc.
And the 'something about everything' comprises Front-end development, Blockchain(Solidity, Eth Smart Contracts), Competitive programming, Machine Learning.

EXPERIENCE

———–

Developed a functional Reddit clone(backend)

Provided APIs for an app in a college based startup.

SKILL

———–

Skill	Level
Node.js	100%
JavaScript	85%
Express.js	80%
MongoDB	80%
Solidity	65%
C/C++	65%
